

Stop and Wait

- Open terminals h1 and h2
- Run the commands
 - `bash h1.sh` (in h1)
 - `bash h2.sh` (in h2)
- Run `reciever.py` in h2 and `sender.py` in h1
- h1 asks for timeout in milliseconds. Enter the required value.
- Go to the required folder where the transferred file(`recv_tst_img.jpg`) can be found.
